 Bhopal Madhya Pradesh

### SKILLS

- Data Science with Python
- Machine Learning
- Deep Learning
- Computer Vision
- SQL
- FaastAPI
- Web Scrapping
- Data Structure and Algorithm

### EDUCATION

B.Tech (Computer Science)

Millennium Institute of  
Technology and Science

Grade - A

### LANGUAGES

- Hindi
- English

### Certificates

- Data Analytics
- Machine Learning with Python

### PROFILE

Enthusiastic and detail-oriented data science graduate with a solid foundation in programming, statistics, and machine learning.. A quick learner with excellent communication skills, eager to collaborate with multidisciplinary teams to tackle real-world challenges in data analysis and machine learning.

### PROJECTS

#### • Language Translator :

In this project work as Full Stack Data Scientist to make a language Translator using FaastAPI. It automatically converts any languages into other languages.

#### • SnapChat using Computer Vision :

In this project work as Data Scientist to make a unique SnapChat which using some filters through the live camera and give some amazing pictures.

#### • Heart Desease Prediction:

This Project related to medical field and work as Data Scientist to develop a model and preprocess the data and evaluate performance matrices.

#### • Cat Vs Dog Prediction :

In this project work as Data Scientist to develop a model which is classify the images of dogs or cats using CNN Architecture.

### Soft Skills

- Communication Skills
- Visualization Skills
- Teamwork and Collaboration
- Domain Knowledge
- Collaboration
